Everything is Now Ready For Diamond Jubilee

Public School Races in the morning at 10—Procession. At 1:45 and Program at School Grounds After.

It now looks as though everything is well shaped up for the King George Diamond Jubilee celebration to be held here next Monday.

The several committees met Tuesday when each club reported good progress being made for the program as outlined in our last issue.

The only change made is that the athletic sports to commence at the morning at 10 o'clock at the school grounds are for public school scholars only. The high school students will join their stunts during the afternoon program, for which prizes will also be given.

The afternoon program will commence at 1:45 when the procession will be formed at the corner of Broadway and Tenth St. and after marching around the grounds where the balm will be carried out.

First and second prizes will be given for the following taking part in the procession:

The best floats; The best decorated cars; The best patriotic costumes; Best national groups; Best comic skits; Best decorated bicycles.

The following will be the order of the procession:

Mayor Cox preceded; Scout Leader with Unit Jack;

The Reddell Band; The local Militia Unit; The decorated floats;

Decorated Cars; Patriotic Characters; The Local Scouts;

Decorated Bicycles; Comic Characters; National Groups;

School Children; Arriving at the grounds the flag will be unfurled by the school under command of Captain Ogilvie, accompanied by Rev. H. M. Hammett and Rev. R. E. Fow.

After all the children present have had a treat of ice cream the high school pupils will join on a program of novelty stunts around the building etc. and will be the whole school will be given.

At the conclusion of the drills each school pupil and all children under school age will be presented with a souvenir mug and more treats.

With favorable weather and the co-operation of parents and citizens generally the day's celebration should prove most successful. Let all turn out and make it a real Diamond Jubilee occasion.

The Reddell football team goes to Taber next Monday for a friendly game.

Word was received in two days announcing the death of Mr. Walter Forecast, a former resident of Redcliff and one of the pioneers. Deceased died at the coast two weeks ago and was buried in Calgary.

Legion Entertains Friends from Hat

Various Games Played Ended In A Draw

Last Friday evening about twenty members of the Medicine Hat Legion paid a return visit to the local Legion and a pleasant social time was spent. Competitions of billiards, ring and bridge were played and it was so closely contested that the final tally showed a draw at the evening. Redcliff was at billiards, Medicine Hat at bridge and at rings the draw was as was the case.

At the finish of the competition a social hour was spent and a musical program was rendered.

The evening light refreshments were served.

New Act Prohibits Burning of Straw

Was Introduced by W. C. Smith in Legislature

A bill was put through the Legislature this week by W. C. Smith, M.L.A. for Empire, titled as "The Straw Conservation Act." The Act provides that the government can declare any specified part of the province to be a straw conservation area and every area so declared shall continue so until the ban is lifted. No person shall destroy any stack or pile of threshed straw until the expiration of the fourth year after the straw was threshed, unless authorized to do so by the Field Crop Commissioner.

The Act provides a heavy penalty for its violation. It is now in force throughout the province.

Favors Commission For State Health

Announced Minister of Health At Ottawa

Minister of National Health D. M. Sutherland, who officially introduced a plan for state medicine for Canada last week, told provincial ministers of health at a conference at Ottawa he favored a royal commission to investigate health conditions with a view to bringing the advantages of medicine to all.

Not strictly partisan move is this, Mr. Sutherland pointed out, and proved it when he announced he intended to embrace labour, financial and insurance interests, when he was ready to pick the members of the commission, if his suggestion met with approval.

Miss Wyatt returned to the School at Peaseville, after visiting the Easter holidays or parents here.

The social held in the Parish hall last Monday evening under the auspices of the vetry, attracted a good attendance. Bridge and Whist were first played. The winners were Evans for bridge and Mrs. T. Jones for whist. Low scores prizes went to Mrs. Henderson and Mrs. H. J. Cox. Dancing followed and the evening refreshments were served.

Joint Jubilee Service Sunday At St. Ambrose

Will Be Held Next Sunday Afternoon at 3 O'clock

A Special Jubilee Community Service will be held in St. Ambrose church next Sunday afternoon at 3 o'clock.

All organizations are invited to attend and arrangements have been made to congregate at the Armory where a procession will be formed to march to the Church.

The church will not be opened until after the procession arrives and the flag unfurled.

Special service sheets will be issued at the church door and hymn books and other service books will not be required. All organizations are invited to join in this service.

Plan For Drouth Area Under Way

First Meeting to Be Held in Regina Soon

Mr. Bennett's huge drought area, reclamation scheme is moving from formal stage into action. The first meeting of the commission will be held in Regina, probably the first week in May. Dr. W. J. Black of the agricultural department of the Canadian National, and Augustus Griffin, of the engineering department of the Canadian Pacific at Calgary, will represent the railways on the commission.

Send Contribution to Cancer Fund Early

Donations Sent By Letter Arr Post Free

"He who gives quickly gives twice." The old saying will be doubly true of those who send in their contributions to the King George V Silver Jubilee Cancer Fund, before May 6th. It is true that donations reaching Ottawa after that date will be gladly received, but on May 6th, His Majesty will be acquainted with the amount contributed in his name, to combat cancer in Canada.

Send your donation today, to Lady Beasbrough, Ottawa. Mark the envelope, "Cancer Fund," and mail free of stamps.

SPECIAL FARES FOR THE KING'S JUBILEE

As May 6th has been declared a National Holiday in recognition of the King's Silver Jubilee, special low fares on Canadian Pacific will apply over the weekend for travel between all stations. It was announced by Mr. R. B. Bellantyne, Ticket Agent.

For those who intend to take advantage of what promises to be one of the most popular weekends of the season, tickets will be sold good going from Friday May 3rd to and including 2 p.m. Monday, May 6th, with return limit until Tuesday May 7th.

Mr. A. Ambury our local baker, and his sister, had Miss Tubert, of Calgary, as their guest over the week-end.

No Reduction in Number of Members

Provincial Election Expected End of June

The fifth and last session of Alberta's seventh legislature prorogued last Wednesday and a general election announcement may be expected at any time.

For fifty-two days the members sat in session, facing enormous grist of resolutions and bills that kept coming down the river last day when the House amended the Daytime Act to license cars carrying cream to creameries, prohibiting the carriage of cream in any but licensed cars.

The question of redistribution sent the House on the last day. D.M. Duggan, Conservative leader, wanted the number of members in the next House cut from 63 down to 54. Mr. Shields U.F.A. of McLeod wanted it cut down to 20 members. He elected at large. Mr. W. H. Howson, Liberal leader, said the situation with an amendment calling for a "substantial reduction" in the number of members.

Premier Reid led the attack against any reduction of the membership at the present time. After a hot debate the U.F.A. majority behind Premier Reid succeeded in defeating the resolutions and amendments offered by Messrs. Duggan, Shields, Howson, T. D. F. A. majority amendments offered by Messrs. Duggan, Shields and Howson. So the coming general election will be for the same number of seats with the same electoral boundaries as at the last general election.

The Shields resolution also asked for a special fall session to put through redistribution, members to receive a per diem allowance for the proposed fall session. The defeat of this resolution is taken to mean that the general election will not be deferred after late June or early July.

"Good Fairy" Starts At Monarch Monday

Margaret Sullivan and Herbert Marshall, seen together for the first time, have been booked into the Monarch Theatre in "The Good Fairy" starting Monday. "The Good Fairy" is the pictureization of the Fairy play in which Helen Hayes starred on Broadway two seasons ago at the Henry Miller Theatre.

In "The Good Fairy" Margaret Sullivan plays an usherette. It is while she is looking at the romantic movies thrown on the walls of the theatre, that she conceives the good fairy idea.

The little usherette conceives the idea that she should be a good fairy to three different people, and she is, in spite of the fact that she has no money to business to be impersonating Providence, and no way of backing up the promises she makes. However, it all comes out right in the end, and the little usherette, who tried to help others, eventually earns a splendid reward for herself.

How is your subscription?

Festival Entrants Give Fine Performance

Should Make Good Showing At The Festival

The School Concert held in Gordon Memorial school room last night at which the Festival Entrants were heard in choruses, recitations, solos and dramatic events, was fairly well attended.

The usual high quality of the former concerts of this nature was well sustained and a most enjoyable performance from beginning to end was rendered. There is no doubt that Redcliff school will make a good showing at the Festival tomorrow in Medicine Hat, judging by the ability shown by the children. The splendid training evidently given by the teachers, and the elaborate costuming.

The Spring Weather Is Most Unusual

Very Little Seeding Done Yet In This District

So far this spring the weather has been most unusual for Southern Alberta. In ordinary years about 50 to 75 per cent of seeding would be completed by this time but this year very little has been done yet, and still the weather is so unsettled. Tuesday was showery and yesterday was so cold and windy that a snow storm would have been no surprise.

However there is nothing to worry about yet as some of our best crops were harvested after our latest Springs.

The coroner's jury investigating the accident on the main highway just west of town last week where A. A. Smith, of Calgary, was killed by a car driven by G. Y. Fay of Calgary, brought in an open verdict.

Conservatives Call Convention For May 15th

To Select Candidates For The Federal Election

Conservatives of the federal constituency of Medicine Hat are calling a convention to be held in Medicine Hat on Wednesday, May 15th, for the purpose of selecting a candidate for the approaching general election.

As a result of the redistribution, this constituency has been considerably enlarged, the western boundary now extending as far as Gleichen. As the Saskatchewan boundary is the eastern limit, this makes Medicine Hat one of the largest electoral constituencies in the Dominion.

Dust Storm's Toll Increasing In U. S.

Many Suffering From Dust Diseases In Colorado

Dust storms are still creating havoc across a wide section of the United States plains, sending additional patients to the hospitals and causing new damage. In Colorado twenty patients suffering from respiratory diseases were taken to emergency hospitals and fatalities in the past week were increased to ten.

South Saskatchewan was also struck with a 25 mile an hour gale and severe soil drifting was reported Tuesday around Fillmore, Weyburn and Assiniboia districts. No serious damage, however, was reported.

"The Painted Veil" Coming to Monarch

Greata Garbo's newest picture, the Metro-Goldwyn-Mayer production of "The Painted Veil" which opens Monday at the Monarch Theatre, is a hundred percent American made, but it offers an interesting circumstance.

Try and find an American in it.

Garbo, who plays the role of an Austrian girl, is Swedish. Herbert Marshall, an English man, George Brent, an Irish man, County Cork, Ken Herdahl, a Dane born in Copenhagen, Cecilia Parker, of Canadian birth, Warner Oland, seen as General Yoo, is like Garbo, a Swede born in Umea, Sweden. While Richard Boleslawski, the director, is a native of Poland and a veteran of the famous Polish Lancers in World War.

Mr. A. C. Hawthorne, who has conducted a gentle furrier store in Medicine Hat for a number of years had his wife hospitalized yesterday. Morning was 65 years of age.

A meeting of business men in town was called for last Thursday evening by the local Social Credit group, to discuss Social Credit. There was a good attendance, almost every business place in town being represented.

WORLD HAPPENINGS BRIEFLY TOLD

Last year the Canadian National Railways established 2,903 agricultural families on 335,120 acres of land the annual report of the system, tabled in the House of Commons, said.

Plans for a six-mile railroad tunnel under the channel between the Japanese mainland and Kyushu Island to cost \$5,000,000 are announced by the ministers of railways.

In an effort to unite all phases of the poultry industry, the Manitoba Poultry Federation has been formed at Winnipeg. Robert C. McGregor, Carman, Man., was elected president.

The British government has refused a communication from the Canadian government relating further objection to the 1935 contract for sale of Russian timber in Britain, the House of Commons was informed.

Dr. Edward Albert Sharpey-Schafer, inventor of the famed "Bacter method of artificial respiration," died March 30 in his Northumberland home. He was 85 years old.

Revision of the lists of elections throughout Canada will open on May 15 next and end July 1. A proclamation by Col. John Thompson, Dominion franchise commissioner, published in the Canada Gazette, fixes these dates.

The first three months of 1935 brought a big increase in building activity in Canada, contracts awarded totalling \$29,201,200 compared with \$19,950,500 in the same period of 1934. The increase was 48 per cent.

Dr. Frank G. Vintzile, of New York, who has lived intimately with words for almost half a century as editor of the Funk and Wagnall dictionaries, observed his 71st birthday hard at work composing a new volume of 200,000 words.

A Queer Combination

Six Blind Musicians Will Play For Deaf Dancers

Six blind musicians in England are about to think the idea of losing them to form their own orchestra. By listening to different broadcasts, they memorized various pieces by memory, being the only way in which they could learn the music, of course. Next month they are to play at a dance in Leeds Town Hall. The dancers will all be deaf mutes who have had to use their eyesight to learn the steps, but were able to hear their instructor. They are taught by watching the steps of couples who are normal. On the face of it this queer combination of dancers and musicians may appear pathetic. But is it not rather triumphant—that handicaps are not insurmountable? The musicians will not see the dancers, the dancers will not hear the musicians... but the spirit is there!

A horse's lifetime is usually agreed at about 25 to 30 years, but English writers have mentioned horses that lived to be over 60.

Old age begins, whether at 40 or 50, when you begin to day-dream of yesterday instead of tomorrow.

The Yangtze Kiang river, in China, contains 7,000 miles of fishes.

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take GIN PILLS for prompt relief at the first sign of these symptoms. You will feel better, look better — be better, if your kidneys are functioning properly.

GIN PILLS FOR THE KIDNEYS

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HILBERT (Copyright—Lancaster) (All Rights Reserved)

Mrs. L. R. writes as follows: "I am a widow with two children, and have been married with a man from the West. He was a good man, and although I have never seen him, his letters are so pleasant that I find myself drawn to him. He is married, but has not lived with his wife for some years, and offers to get a divorce if I accept his offer of money. I feel that I should not marry, because I am still young, but naturally don't want to make a mistake. My first marriage was very happy, and my husband left me a substantial sum of money. Any help you care to give me will be welcome."

I am sorry that I cannot be over-optimistic about your chances of making a really favourable marriage with this man, Mrs. R. He is not so good—so he is a matter of fact of rather a narrow point of view; not really a good man.

He is likely to get very irritable, if not badly-tempered, and whilst a lot of us have this trait at times, it is allied as it is in this case with narrowness of mind, that is a serious matter.

This man is not easy to live with. He is rather changeable, too. He will be inconsistent, not at all steady, temperamental, but decide in his mind, and he is difficult to get on with.

Another characteristic that stands out in this man's vanity. He expresses this in one of his letters to you when he writes on the subject of lady friends that he has had, and when she is difficult to get on with, he prefers you to all the others, this too shows conceit.

As regards yourself, your writing shows that you have a rather emotional nature, you are quick to feel and you are a person of marked capacity for affection. Yours is essentially a nature that needs company. There is nothing of the cold or aloof type about you. You are, in the present, quite unbalanced, like lots of us, and have a liking for being 'on the go'.

You are still young, and I certainly agree with you that marriage would be an accident thing for you—provided that you get the right man. It is not a good thing to be a happy choice has given you a standard that it may not be easy to handle. But I have no doubt that the opportunity will again arise.

In the meantime, I am sorry that I cannot advise you to accept the man whose writing you are reading, with, at least, taking an opportunity of checking up my summing up of his character.

Would you like an analysis of your character? And have you any friends whose real nature you would like to know? Send specimens of the writing you wish to be analyzed, stating briefly in each case, and enclosing 10c coin for each specimen. Send with 8 stamped addressed envelope to: Lawrence Hilbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters are confidential and replies will be sent as quickly as possible.

Would Make Good Cheap
Polish Scientists With Secret 2-Ray Chain New Extraction Process

What would happen if Professor Dunskey, the Polish scientist, should make his claim that he has secret 2-ray process he can extract from auriferous earth eight times more gold than is possible by the methods hitherto employed?

Authorities in Paris admit that it would mean the conversion of the previous metal into a new one, perhaps of no greater value than lead.

But the same authorities estimate such a possibility, despite the report of M. Bonn, expert in chemistry in the Paris courts.

After testing Dunskey's apparatus at San Remo, Italy, he says it is unquestionable that it permits the extraction of much larger quantities of gold than any other known process.

Maitre Jean Charles Legrande, the Paris lawyer, stated that he intends to demand a return of the case in which the Paris court sentenced Dunskey to two years' imprisonment for fraud.

The City of Lima, Peru, celebrated its four hundredth birthday January 18.

Approximately 20 per cent. of all school children under the age of 20 have defective sight.

Oysters contain 200 times as much iodine as milk, eggs or beefsteak.

Why He Was Excited

British Tommy Dropped Hand-Saw Into Ballot Box

A friend of mine who was playing an official part in the management of the four plebiscite told me of one incident which every student of international government will have preserved. British soldiers were carrying the carefully sealed ballot boxes into the room where the counting was to be done.

At one of the tables a Dutchman was heard in voluble dispute with a British Tommy. The Dutchman, who talked English, was perplexed and annoyed because he could not understand a word the Tommy said. My friend went to the rescue, but was quite unable to act as interpreter.

The Tommy's Yorkshire was too broad.

A sergeant who knew him was called in to help. He explained that Yorkshire was sometimes like that when talked by men who were drunk or excited. It turned out that the Tommy had quite good reason for being excited. He had dropped his hand saw into the ballot box.

To retrieve the sawdust must specially opening the ballot box before the proper witnesses and with due formalities. When various party leaders had been filed up and the proper officials had signed the necessary documents, the box was solemnly opened. The sawdust retrieved, and an international incident closed in perfect amity.—New Statesman and Nation.

The Smallest Dynamo

Hungarian Has Made One No Larger Than a Matchbox

Unemployed Ivan Zimmerman is displaying in Szekesfehervar, Hungary, a dynamo which he claims is the smallest in the world. It is about the size of a common fly, being four millimetres high. The assembling of the parts was done under a home-microscope. It required four months to prepare the drawing and make the device.

Historic Chapel Reopened

Forlorn Corner Of Sheffield Cathedral Has Been Restored

South Yorkshiremen the world over will have with interest of the opening by Dr. Leonard Barr, Bishop of Sheffield, of the historic Shrewsbury chapel within Sheffield cathedral.

It is more than four centuries since what was then the old parish church of the city of culterly last that portion of the building known as "Our Lady's Aisle and Her Chapel."

In the centuries which have since passed, the chapel has remained, until now, merely a forlorn corner of the church, and was noted only as a burial cell, by the members of the family of which the Zaria of Shrewsbury were the head.

The chapel has now been suitably restored and decorated. The north choir aisle and the Rowley Hill chapel have likewise been restored.

The organ is being moved to the west end of the cathedral and this will enable the cathedral to return to the dimensions originally planned by its medieval builders.

New Aid For Blind

"Electric Eye" Enables Them To Read Ordinary Print

An announcement says Prof. A. G. Goldman of the Soviet Ukraine has invented an "electric eye" by means of which the blind with their fingers would be able to read ordinary printed books.

An apparatus equipped with lenses moves over print and projects images of letters onto a photo-cell, he explained. The cell changes the images into electric impulses which cause vibrations on a special desk designed for this purpose.

New Machine Perfected

Can Determine Centre Of Gravity Of Human Body

A machine which can determine the centre of gravity of the human body has been designed and built in New South Wales at the Melbourne University.

The machine was described and demonstrated before the physiological section of the Science Congress in Melbourne by Prof. Calverley.

Although the machine is very heavy, it is so sensitive that a weight of one-half of an ounce placed one foot from its centre will disturb the balance. Disturbance of the centre of gravity in certain diseases may be determined by the machine.

Istanbul Solves Problem

Pedestrians And Vehicles Have Been Assigned Different Streets

Pedestrians of Istanbul, Turkey, have been assigned streets for their exclusive use while automobiles and horse-drawn vehicles have been given sole rights on others. One-way streets also are being tried. Traffic lights were used for awhile and rejected. The city has a real traffic problem in the congestion of its narrow and winding lanes.

Pure water is denser and heavier at 4 degrees Centigrade.

Little Journeys in Science

(By Gordon H. Guest, M.A.)

Gasoline consists of a mixture of liquid compounds known as hydrocarbons. The use of gasoline as a source of power in engines is due to the fact that the gasoline is easily changed to a vapour and that a mixture of gasoline vapour and air, when ignited, burns instantaneously, or, as chemists would say, explodes. The mixture of gasoline vapour and air is led into the cylinder of the engine where it is ignited by a electric spark.

"Ethyl gasoline" which is now used so widely, is gasoline to which has been added "much amount of two colorless liquid compounds known as lead tetraethyl and ethylene bromide. The lower and upper members of the "knocking" of the engine when the volatile lead bromide which escapes in the exhaust.

In former times the most important product obtained from these products and hence science has been forced to increase the yield. This is done by distilling kerosene and similar oils at high temperatures under pressure. The process is known as the "cracking" of the oil. The average crude oil from the large producing areas of Texas and Oklahoma contains about 80% of gasoline which is desired.

Recent experiments have shown that the gas hydrogen under high pressure changes powdered coal and petroleum into kerosene, oil, gasoline, and similar products. In fact, the petroleum products have exhausted this process may supply man with these products as necessary to our modern civilization.

May Try Another Trip

Willies To Build Sub-Sea Boat For Arctic Voyages

Undoubtedly by failure in 1931 to penetrate the Arctic by submarine, the British Admiralty has been ready to begin construction of a special sub-boat for another attempt.

Arriving at Miami, Florida, from Lima, Peru, by Pan American Airways, Mr. Hubert Wilkins said the proposed undersea boat would be "very simple."

"The adventure of the Nautilus taught me," he said, "to leave off everything that was not absolutely necessary."

China Buys Old Times

The Chinese market is beginning to absorb immense quantities of old worn-out automobile tires bought up in the United States market. One steamer recently took 100 pressed bundles of old tires, averaging 20 each, to Shanghai. These are largely used as soles for sandals worn by coolies and peasants.

Minerals are being studied to get the tonnage for the Alaska Railroad.

London plans to spend \$20,000,000 for new police buildings.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen here to a half-share in plenty of trouble," the lawyer said to Gerald Kene. "The broken spirit has been systematically looting the mine and old Joe Carr, your partner, is destroying himself."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Carter, who had graduated him, of his discovery of a rich gold mine, and shows plans of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He beats Stone, who, while trying to throw him into a pool of water.

Dustin learns that Gerald Kene has been sent for, and also that Duro Stone has returned the broken spirit man running Carr's cattle. He sets out with Dad Kane to learn the location of the gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fires the shooting on Peyrol Gregg, a drug addict, who, stupified by the anesthetic he had taken, did not know whether he was guilty or not. They bury Kane and return to the broken spirit ranch.

Meanwhile at the Broken Spirit ranch, Carr, Edith and Dustin are to the mining of entries in the notebook belonging to Dad Kane that Stone had found. Stone thinks of a possible relation, and, accompanied by Edith Carr, rides out to find water to test out his theory, which proves correct, and they find the rich gold deposit in the prospect's notebook.

As they return to the ranch, they meet Dustin leaving the house, who purposely, but unsuccessfully, tries to ride down Stone.

Sam Dustin, the day before Gerald Kene's arrival in Seaco, contacted Peyrol Gregg, who told him of Kene was a relative of the old prospector, and was seeking information as to the old mine whereabouts. If Peyrol wanted to live, and prevent finding out about the mine, Gregg should shoot Kene when he arrived.

CHAPTER XXVII—Continued

When Dustin grinned at the thought of the ranch man, once the doctor of the Valley, he searched for a gun in a murder case.

CHAPTER XXVIII—Continued

When Dustin grinned at the thought of the ranch man, once the doctor of the Valley, he searched for a gun in a murder case.

Garry was laughing frankly as he thrust a big hand into the side-pocket of Joe Carr's coat. But that grin suddenly froze on his face as he drew from the pocket a wadded mass of green-and-yellow silk. He held it by one dirty corner and showed it to all the waiters started back as a short heavy Derringer pistol clattered to the floor.

"You're cleared, Dustin," he said. "I reckon this clears me of all suspicion," he snarled. "When the Hour-Glass girl is shooting their own partners they're dropping pretty damned low."

Garry turned sharply on him: "But I give you a word of advice. Say nothing of this here till I tell you. If you want to get out, I'll let you go. If you don't, I'll have to reckon with you. Get me?"

Dustin looked at him quietly and a chilly feeling ran up his back. He did not fear many men but he had met more than a few who had been as good as dead for a long time.

"Good Lord," he snapped. "I'm not interested in Hour-Glass kills of Hour-Glass. It's not rat rat as far as I'm concerned. I'll say just a word about it."

The door slammed behind him and Stone promised and Carr started the car down the street. The moment darkness hid the car, Stone hurried up Rips and almost by force dragged him into his room.

Neither man ever told what took place in that office but in a half-hour Stone ordered Carr and Carr started down the street for the little office where Jameson held forth. That gentleman, bending over a form-case, was matched to a stout and an evil-smelling mass of green-and-yellow silk was thrust under his nose.

"What's that smell like?" demanded Carr. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

"That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone. "That's what stinks," said Stone.

stone. You say his name's Kene?"

"Yes, Gerald Kene," said Drew. "He and Joe over the Hour-Glass together. That's the best thing to do. You take care of Joe. I'll get out to the Hour-Glass. I'm afraid I'll take some explaining to make Edith understand."

With Logan's help they got the wounded man over to Epps's house and a woman was secured to act as a nurse and Drew drove Stone aside.

"You better stop here to-night, I reckon," he said. "What is it?" he said sharply for Stone was tugging at his pocket.

"I was going to say that I'd better stay in here," said Stone. "I've got a key I want to look into, Drew."

"He drew from his pocket the green-and-yellow handkerchief. "You can't tell one Derringer from another," he said. "But wearing advice is different. Did you ever know any man wear a damnable thing like this?"

It's got three bullet-holes in it! So there's no doubt about what took place. The would-be murderer had the gun pointed at him and he fired through it. That's why we didn't see any marks. Did you ever see any wearing a thing like this?"

Drew shook his head. Things were moving too fast for him. "I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"

"I never did," he said. "Well . . . I just got to get back to the Hour-Glass. Look out for young Kene and old Joe, will you, Stone?"
